

offices, food stamp caseworker supervisors and food stamp caseworkers will be sampled. In addition, a random-digit-dial telephone survey also will be conducted with a sample of presumptively FSP-eligible households, living in the areas served by the 120 sampled local food stamp offices, who are not participating in the FSP.

ERS, working with Abt Associates and Health Systems Research, will conduct the telephone surveys of FSP supervisors and caseworkers, FSP applicant households, and FSP-eligible nonparticipating households. FSP applicant households without telephones will be interviewed in-person. The household telephone interviews will be conducted using Computer-Assisted-Telephone Interviewing (CATI). Responses are voluntary and confidential. To minimize the burden on applicant households, a substantial portion of needed data will be collected by abstraction from local offices' case file records. Survey data will be used with other data for statistical purposes and reported only in aggregate or statistical form.

No existing data sources, including FNS administrative data, can provide all the information needed to complete the Study of Program Access and Declining Food Stamp Participation. These data and the research they will support are vital to the USDA's ability to understand reasons for recent declines in FSP participation.

Estimate of Burden: Public burden for this data collection is estimated, on average, as 60 minutes for caseworker supervisors and caseworkers; 30 minutes for food stamp applicants; 5 minutes for screening households to determine presumptive FSP eligibility; and 30 minutes for FSP-eligible nonparticipants. The estimates include time for listening to instructions, gathering data needed, and responding to questionnaire items.

Respondents: FSP caseworker supervisors, FSP caseworkers, FSP applicants, households with residential telephone numbers, and presumptively FSP-eligible households.

Estimated Number of Respondents: 240 FSP caseworker supervisors, 480 FSP caseworkers, 1,425 FSP applicants, 33,333 households with residential telephone numbers, and 1800 presumptively FSP-eligible households.

Estimated Total Annual Burden on Respondents: 5111 hours.
